and is the perfect cross over makes it ideal for riders of on all the cycle trails we tour

### M18 Sport Elite Special

In all respects exactly the same as the F18 Cruise Elite different handlebar profile. (more of a mountain bike style). 10 speed gearing and 29 inch wheels. High bar.

Special except for having a bar and

# Tuatara Tours Carbon Fibre E Bikes

Tuatara Tours HYBRID E-bikes are designed and built in New Zealand to be versatile and flexible so they can handle a range of New Zealand riding conditions. The lighter carbon fibre frame and powerful motor mean they are far superior to other similar e-bikes on hills where performance is critical.

Electric bikes don't have to be heavy and feel like farm machinery. Carbon fibre bike frames, historically only available to high-level athletes, are super strong and light providing a superior, efficient, responsive ride.

Every Tuatara Tours HYBRID E-Bike is hand-built with careful attention to detail. Carbon fibre is two times stronger than the alloy used in premium bike frames, and at a fraction of the weight. E-Bikes don't have to be heavy and hard to handle. The carbon fibre frames make them a joy to ride and manage, even for petite riders.

With this manufacturing process you now get superior strength, reduced weight and a responsive ride. High modulus carbon fibre makes for a super-light frame to which is added a high-performance motor and high-spec components to create an E-Bike for more adventurous and comfortable trail riding.

## MOTOR — 300 WATT BAFANG MM G33

HYBRID Bikes use the clever BAFANG MM G33, 300 Watt motor for superior torque and speed with reduced weight. Bafang is the same electric bike motor manufacturer that the world's most famous ride sharing company has chosen for its US fleet of over 100,000 electric bikes. The reliable MM G33 produces a maximum torque of 95N/m so you don't have to worry about going up hills anymore.

## BATTERY — SAMSUNG SDI

HYBRID E-Bikes use SAMSUNG SDI battery technology for quick recharge and a range of up to 100km.

The SDI cells are secured in a rigid cage. This standard feature on all HYBRID E-Bikes provides safety and security by keeping the cells isolated so they will not short circuit. Most bike brands use a simple film wrap to isolate the cells. Increased reliability, short recharge times and best-in-class range means you can spend more time out there.

## HIGH SPEC COMPONENTS

Only premium components are used on HYBRID E-Bikes, giving you performance and reliability. Tektro Hydraulic brakes, RST forks, along with Shimano Deore gears and derailleurs are used. These rugged components have a proven track record and are readily available from quality cycle mechanics, allowing you to relax and enjoy the ride.

## CONTROLLER

All HYBRID electric bikes utilise intuitive Intelligent Controllers and premium, large format, LCD screens to maximize your comfort.

The Intelligent Controller provides five pedal assist levels and is conveniently mounted on the handlebars. It also features a unique 'Walk Assist' function so no pushing is required. The auto light function makes tunnel riding safer. The Intelligent Controller and large format LCD screen makes controlling your HYBRID bike simple.

HYBRID E-Bikes, are the only Climate Positive E-Bike available in New Zealand.

### WILDCAT TRAIL 5

Aluminum, Women's Specific Frame, 27.5" Wheels, Low Standover. 11 speed gearing.  
Mid to low bar

### MARIN LARKSPUR

Veteran riders have been building and cruising bikes like the Larkspur for years, making bikes that are just as functional as they are fun. Picking the best from the mountain bike world and blending it with commuter sensibility, the Larkspur is ready to take you most places worth riding to. (Not used on the Alps2Ocean Cycle Trail)

# Tuatara Tours Hire Bikes

All of our bikes have a bell, a bike stand, a rear carrier with a trunk bag where you can carry your personal gear whilst on the trail. In the carrier bag you will find a tyre pump, a small toolkit, puncture repair kit and a bike lock. All of our bike seats are the very latest unisex design and made from memory foam which is more comfortable than a gel seat. They all come with a bottle carrier attached to the handlebars.

**LARGE TRUNK BAG**

This deluxe Bag is a large trunk bag which includes an expanding top section, large roll-out side panniers. Large 18 litre capacity.

**COMFORT SEAT**

New unisex maximum comfort memory foam seat.

Handlebar configuration for our hire E Bikes

All of our standard bikes are equipped with a bike computer so you can keep track of your distance travelled and your speed.
